PROFILE

BS Information Technology graduate with hands-on experience in IT support tasks, records management, data encoding, and building database-driven web applications. Completed an IT internship at the Bureau of Fire Protection, Santiago City, and served as lead programmer on a capstone project. Seeking an entry-level role in web development, IT support, or IT staff work, remote or onsite.

TECHNICAL SKILLS

- Web development: HTML5, CSS3, JavaScript, Bootstrap, PHP
- Database: MySQL, database design
- IT support: basic computer and printer troubleshooting, wireless printer setup, data encoding, records management; learning networking fundamentals
- Office and design: Microsoft Word, Excel, PowerPoint; Canva; basic Photoshop
- Familiarity with AI tools for productivity and task assistance

CORE COMPETENCIES

- Good English reading and writing skills
- Teamwork and Collaboration
- Able to follow guidelines carefully
- Time Management
- Ability to work under pressure

EXPERIENCE

Bureau of Fire Protection (BFP) Santiago City
January 2026 - April 2026

IT Intern

- Assisted hundreds of clients with business permit-related processes using the Fire Safety Inspection System (FSIS).
- Encoded establishment information into Excel spreadsheets and helped manage digital and physical office records.
- Troubleshot printers and configured a wireless printer for office use.
- Provided technical and administrative support to office personnel.
- Designed PowerPoint presentations, posters, and Canva materials for office activities and information campaigns.
- Assisted with audiovisual equipment during seminars and activities.

PROJECT

BSIT Academic Capstone Project
January 2026 - April 2026

Local Government Information Hub (LGIH) of San Mateo, Isabela

- Built a web-based application with PHP, MySQL, HTML, CSS, Bootstrap, and JavaScript, using PHPMaker 2024 for CRUD scaffolding and customizing it.
- Designed an administrative dashboard for managing announcements, documents, local services, and job postings.
- Implemented CRUD functionality and database integration.
- Used AI-assisted development for technical documentation, debugging, and brainstorming.
